POWDERED PRODUCTS

Poland Food is a company created by people with a passion, already for 18 years working in the dairy market. We are a manufacturer of milk powders. We have and continually develop our milk supply. We produce supplements and nutritions for athletes. Our products are present on all continents.

Quality. We offer high quality services in accordance with international standards and national legislation. We cooperate with leading manufacturers of dairy and food products both on the domestic and foreign market. They hold a certification system of the integrated quality management system based on ISO 9001/2000 and HACCP.

Our headquarter is based in Gniezno - the first capital of Poland. **Our motto is a partnership approach to business, innovation and continuous improvement. We invite you to cooperation - check us!**

From 15th of December 2011 we participate continuously in the Reliable Company program and provide a range of information to demonstrate our credibility. At the request of our partners and customers we provide registration information, data about decision making people in the company and obtained achievements.

Milk purchase. Vibrant and dynamic development of Poland Food would not be possible without the participation of milk producers. We pay always on time, we talk with each manufacturer individually. Payment for milk is always until the 15th of the following month. We offer very favorable prices, help in the development of farms by assisting in the purchase of dairy cows and milk production equipment. We handle all the paperwork for you regarding the signing of the agreement with us.

- stimulates the secretion of testosterone
 - increases strength and muscle mass
 - increases training efficiency
 - affects better post-workout regeneration
 - increases libido - increases sexual performance

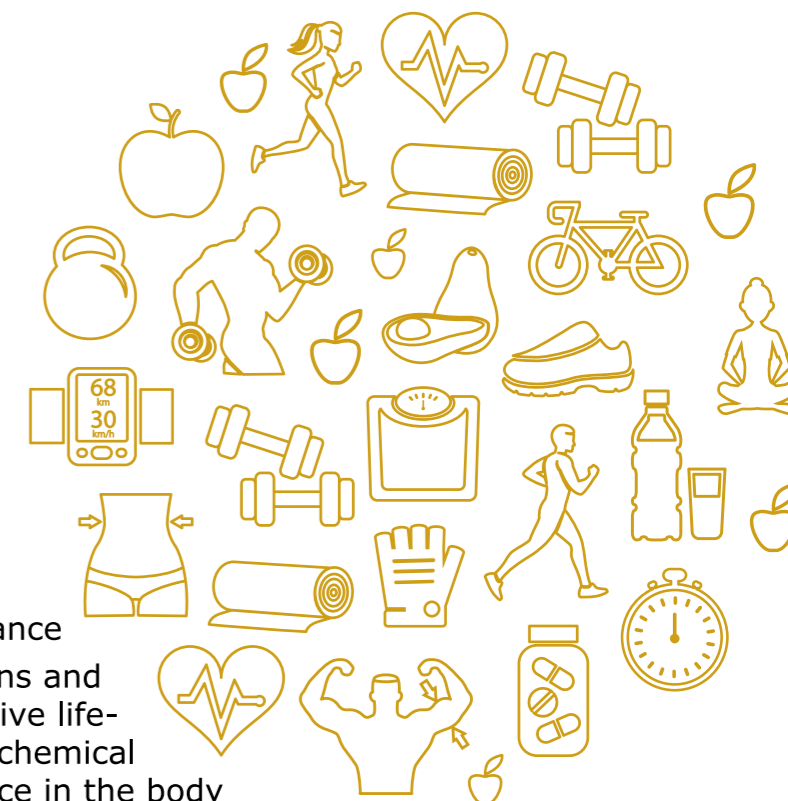

VITAMINS AND MINERALS

VITAMINS FORTE 60 TABS

- Vitamins Forte is a complex of vitamins and minerals necessary for the proper functioning of the body.
- accelerates the regeneration process in the muscles
 - increases physical and mental performance

Athletes have a greater need for vitamins and minerals than those who lead a less active lifestyle. This is due to the high rate of biochemical and physiological changes that take place in the body of athletes under the influence of long-term training loads. The effect of these changes is a faster loss of vitamins and minerals and the associated risk of deficiencies. Chronic deficiencies can slow down the regenerative processes in the muscles and cause a general decline in physical and mental performance.

CARBOHYDRATE - PROTEIN NUTRIENTS

MUSCLE PACK 2000 g

- The high content of balanced protein and high quality carbohydrates.
- A small amount of fat.
- Professional help in balancing the daily diet.
